ID: 030103022

Curriculum: Lubrication

Sub-category: Preparation

Course Description

Tools and technology for preparing lubrications including mixing devices, measuring tools, and useful charts for metric and imperial and apothecary value conversions.

Course Objectives

After completing this lesson, you will be able to accomplish the following tasks:

- Identify five tools useful in mixing lubrication.
- Explain the difference between the three measuring systems: metric, imperial, apothecary.
- Convert 'capful' into metric and imperial measurements for volume (mL and teaspoons).
